Summary

Front-End Web Developer who is passionate about building exciting, responsive applications as well as learning new technologies.

Technical Skills

HTML5, CSS3, Bootstrap, Responsive Design, JavaScript, Typed.js, jQuery, RESTful API, GitHub

---

Projects

Men's Group Discussion Application | Front End Developer
GitHub: https://github.com/aprila13/Discussion-Group
An application which allows users to view information pertaining to the discussion group as well as sign up for meetings using the Formspree API.
Core responsibilities included:
- Developing the design and the UI which includes a visually appealing parallax scroll feature.
- Using the JavaScript Library, Typed.js to create an engaging typing feature.
- Integrating the Formspree API to ensure that users are able to sign up for meetings as well as contact the discussion leader.
- Successfully collaborating with the client to design, test and troubleshoot prior to deployment.

New York Times Application | Front End Developer
GitHub: https://github.com/aprila13/NYT-API
An application built with the New York Times API and updates as the NYT publishes new articles.
Core responsibilities included:
- Creating the design and the UI which includes a visually appealing parallax scroll feature.
- Producing a dynamically updated application to ensure a pleasurable user experience.
- Utilizing Fetch API to retrieve data from the New York Times API.
- Used Fetch API to build a dynamic and interactive application.

Open Weather Map Application | Front End Developer
GitHub: https://github.com/aprila13/Weather-API
This application was built with the Open Weather Map API. Users are able to view weather updates by selecting a city and state.
Core responsibilities included:
- Creating user-oriented visuals and features while maintaining functionality.
- Using Fetch API to retrieve JSON data from the Open Weather Map API.
- Building with ES6 classes to enable local storage.
- Applying RESTful API endpoints to create a user updated application.

Loan Calculator Application | Front End Developer
GitHub: https://github.com/aprila13/Loan-Calculator
An application that allows users to calculate loan repayment.
Core responsibilities included:
- Creating an intuitive user interface while maintaining functionality.
- Developing a responsive web application while using vanilla JavaScript.

Good Looks Design | Front End Developer
GitHub: https://github.com/aprila13/Good-Looks-Skincare
This design is for a fictional retailer named 'Good Looks'.
Core responsibilities included:
- Creating the UI for fictional skincare retailer.
- Building and designing an interactive e-commerce site with landing, product selection and checkout pages.
- Creating user-oriented visuals and features while maintaining functionality.
- Integrating user-orientated features while creating an application which is production-ready.

Temperature Converter Application | Front End Developer
GitHub: https://github.com/aprila13/Temperature-Converter
This application allows users to convert temperatures from Fahrenheit to Celsius and vice versa.
Core responsibilities included:
- Developing a user-friendly application while delivering quality, reusable code.
- Utilizing knowledge of vanilla JavaScript to create conversion application.

Education

Modern JavaScript from the Beginning | Udemy | 2020
JavaScript Algorithms and Data Structure Certification | Free Code Camp | 2020 (in progress)
Responsive Web Design Certification | Free Code Camp | 2020 (in progress)

City University of New York, New York, NY
Teaching English to Speakers of Other Languages | Master's of Science | 2012

Brooklyn College, Brooklyn, NY
Political Science | Bachelor of Arts | 2009

Certificate of Completion

This is to certify that **April Craig** successfully completed 21.5 hours of **Modern JavaScript From The Beginning** online course on Feb. 21, 2020

Brad Traversy
Brad Traversy, Instructor

&

Ʊ Udemy
